ACCELERATED MATH DURING SUMMER!

Brookfield School will be partnering with Mathnasium for our summer program this year! Brookfield will be working with Mathnasium to adapt their exemplary math instruction to match our already accelerated curriculum, allowing Mathnasium to meet our kids where they are and provide them with excellent math instruction and enrichment during the summer.

Mathnasium has a history of helping students to make huge strides in math ability. With as little as two days a week in their program, the average student can progress an entire grade level in as little as a few months. This is exciting because we are offering Mathnasium classes five days a week at the Brookfield campus this summer at a huge discount! Our partnership with Mathnasium will allow for a rigorous summer program that will be able to help any students get up to speed or accelerating other students even further. Some details of the summer program are as follows:

How does it work?

- 5 days a week from 3-4 PM at the Brookfield campus.
- The cost includes 20 sessions for the four week period:
- Our discounted price for Mathnasium is \$400 per student.
 - Brookfield students will receive a \$100 discount.
 - Students enrolled in two sessions of summer camp will also receive an additional \$200 discount!

This means that any Brookfield student enrolled in our summer camp program can take advantage of Mathnasium for \$100 for 20 sessions! To get the most out of this program it is highly suggested that you plan on your student attending the full month, and attending as regularly as possible (missing a few days during the summer is expected and manageable.)

Be sure to check out the other classes that our summer camp is offering in the morning. These classes, as well as swimming up to three days a week, are all included in the Summer Camp price!
